AIR ENFORCEMENT BRANCH

Re: Your Request for Reduction ~~IRA~~ ~~visible~~ Emissions
Self-Monitoring Observations During Fourth Quarter, 1992

Dear Mr. Weber:

We have reviewed the USX self-monitoring visible emission observation data that you submitted, and also BAPC observation data, covering the third quarter (July, August, September) of 1992 for the Clairton Works' coke batteries. Pursuant to our review, we concur with your request to perform reduced self-monitoring [two(2) observations per calendar week]. The sources eligible for reduced self-monitoring during the fourth quarter of 1992 are charging doors, doors, offtakes and lids for Batteries No. 1, 2, 3, 7, 8, 9, 13, 14, 19, 20 and "B"; stacks for Batteries No. 13 and 20; and pushing for Battery "B".

Continued eligibility for the above sources and future eligibility for self-monitoring reductions on other sources requires the submittal of self-monitoring data pursuant to Appendix 5 of the Consent Decree. If you have any questions, please contact me at 578-8136 or the above address.

Very truly yours,

William U. Clark
